

Name _____

1 Read the article and circle the correct option.

What is another word for *smart*?

- a. young b. intelligent c. modern

Smart Living

Many **household** appliances —like televisions, fridges, washers and dryers— use technology. Sometimes we call these objects *smart*. For example, a smart TV connects to the Internet, and a smart cooker can find **recipes**. A smart fridge can **sense** what is in it!

There are smart homes, too. They have got the same types of rooms as traditional houses, but they are modern and automatic. They can control their **lights**, appliances and temperature. Sometimes they can speak!

2 Read and complete the sentences.
